

QUALITY POLITICS

The Management of MECONTROL, S.L., whose main process is the machining of steel, cast iron, bronze, aluminum and stainless steel parts on CNC machines, in its constant attitude of satisfying customers and interested parties and aware of the need to improvement and adaptation of the company to market conditions, as well as the promotion of good environmental practices, establishes the bases of its quality and environment policy:

- That through the implementation of the Quality and Environmental Management System, our products satisfy the needs, expectations and requirements of our customers and interested parties, as well as any other legal or regulatory requirement applicable to manufactured products, minimizing risks and enhancing the associated opportunities.
- That it is committed to the protection of the environment, including the prevention of pollution, as well as compliance with applicable legislation.
- That the organization and rationalization of all mechanization processes, and those of the Quality-Environmental Management System, have the purpose of ensuring quality and improving as much as possible the social climate of the company and the motivation of all its employees. staff.
- That all of the above serve to improve relationships with our clients and suppliers and to establish quality and environmental objectives in order to continually improve the effectiveness of the Quality-Environmental Management System.
- The Management of MECONTROL, S.L. assumes the commitment to disseminate this quality policy at all levels of the organization and provide the necessary means to ensure that it is understood, kept up to date and periodically reviewed and applied at all levels of the company.
